

SILVABRITE 100[®]

The Original Lead-Free Solder

When it comes to a safe, easy to use solder in drinking water systems, the Pros only trust one product: **Silvabrite 100**. Used with confidence for over 40 years!

Characteristics

Silvabrite 100 is a lead-free and antimony-free, non-toxic solder which contains the same safe metals used in dental fillings. It offers a low melting point and wide melting range for excellent flow and control. Silvabrite 100 also creates strong, corrosion-resistant and leak-tight joints.

Advantages

1. Lead-free composition
2. Easy to use
3. Excellent "capping off" ability
4. Higher shear, creep and tensile strength
5. Outstanding appearance
6. Exceptional flow and wetting action

Applications

Silvabrite 100 is suitable for joining copper, steel, stainless steel, nickel metals and alloys. It is used with a soldering flux such as Lucas Milhaupt Silvabrite Paste P/N 75108 and Handy Type TEC Liquid Flux P/N 97000.

Product Name	Part Number	Composition (Wt.%)		
		Sn	Cu	Ag
SILVABRITE 100	56761	95.6	4	0.4

Silvabrite 100 is listed by IAPMO plumbing codes.
ASTM B32 Grade E
